JANITH NISHEN

Software Engineering Internship

janithnishen@gmail.com | +94 762318944 | LinkedIn | GitHub | Portfolio

PROFILE

I'm a third-year Information Technology undergraduate at the University of Moratuwa with a strong interest in software engineering, full-stack development, and problem-solving. Experienced in building mobile and web applications using modern JavaScript frameworks, with hands-on exposure to agile team environments. Passionate about applying technology to solve real-world problems, with a proven ability to deliver functional software projects from concept to deployment.

EDUCATION

BSc (Hons) in Information Technology *(2024 – Present)*

University of Moratuwa, Sri Lanka

CGPA – 3.72

G.C.E. Advanced Level – Physical Science Stream *(2022)*

Physics: A | Chemistry: B | Combined Mathematics: B

TECHNICAL SKILLS

Languages: JavaScript, Java, C, Python,TypeScript

Frontend: React.js, React Native, NextJS, HTML5, CSS3, Bootstrap

Backend Development: NestJS, Node.js, Express.js, RESTful APIs

Databases: Firebase, MongoDB, MySQL, PosgreSQL

Python & Data Analysis: NumPy, Pandas, Matplotlib, seaborn, skitlearn

Cloud & DevOps: AWS (S3), Linux, Bash, Docker, GitHub Actions, CI/CD

Tools & Platforms: Git, GitHub, Postman, VS Code, Android Studio

PROJECTS

Smart Credit+ (2nd year Software Project) – Peer-to-Peer Lending Platform

React Native, NestJS, Firebase | 5-member Agile team | GitHub Repository | Live Demo

- Smart Credit+ is a peer-to-peer lending platform designed to securely connect borrowers and lenders while simplifying loan requests, agreements, repayments, credit evaluation, and platform administration.
- As team leader, I was primarily responsible for the design and development of the borrower module.
- Implemented borrower module features, including a dual payment system and a credit scoring engine to assess borrower eligibility dynamically.
- Built RESTful backend services using NestJS and Firebase for secure, real-time financial data management.
- Developed a cross-platform mobile interface that provides borrowers with a smooth, secure user experience.

Smart Shooting Gallery - Interactive Microcontroller System

ESP32, Arduino, WebSockets, Stepper Motors | GitHub Repository

- Built an automated shooting gallery with a wireless glove controller, stepper motor targets, and IR-based shot detection.
- Implemented real-time WebSocket communication for live leaderboard updates across connected devices.

RentalHub Sri Lanka -Full-Stack Rental Marketplace

Personal Project **|** GitHub Repository | Live Demo

Technologies: Next.js, NestJS, TypeScript, PostgreSQL, Prisma, Supabase, Docker, GitHub Actions.

- Developed a full-stack rental marketplace using Next.js, NestJS, TypeScript, PostgreSQL and Prisma, supporting property listings, rental requests, matching and booking workflows.
- Built REST APIs and backend services for property management, rental matching, administrative operations and financial workflows.
- Implemented Supabase authentication and role-based access control (RBAC) with granular permissions for renters, property owners and administrators.
- Containerized the application using Docker and established automated testing and CI/CD workflows with GitHub Actions.

VOLUNTEERING

- Faculty Career Fair 2026 – Volunteer, Logistics Committee

CERTIFICATIONS

- Python for Beginners – University of Moratuwa
- Responsive Web Design – freeCodeCamp (Jul 2024)
- AWS Cloud Practitioner Essentials – AWS (Course Completion)
